CafeReady Frozen Pastry Dough: Quick-Start Guide for Café Partners

Ovenrise Industrial Bakery Co., Ltd., Lamphun · Ref. QS-CR-2026-03 · Version 3 · Issued 4 August 2026

1. About this guide

CafeReady is the frozen, unproofed pastry dough range made at the Ovenrise production plant in the Northern Region Industrial Estate, Lamphun. Pieces are shaped, laminated with butter and blast-frozen. Your café proofs and bakes them on site. This guide replaces Version 2 (March 2026); the main changes are the new minimum order and a longer proofing time for the Danish swirl.

2. The CafeReady range

- **Butter croissant (code CR-70):** 70 g raw weight, 60 pieces per case, 1,380 baht per case.
- **Pain au chocolat (code PC-80):** 80 g raw weight with two dark chocolate batons, 48 pieces per case, 1,296 baht per case.
- **Pandan custard Danish swirl (code DS-90):** 90 g raw weight, 40 pieces per case, 1,240 baht per case.

Prices exclude VAT and apply to orders delivered from 1 August 2026. Each case label shows the batch code (for example CR-70-B2614).

3. When the delivery arrives

CafeReady leaves the plant at –22 °C in a refrigerated van. The driver will wait while you check the delivery, so please follow these steps before you sign:

1. Open one case from the top of the stack and one from the bottom.
2. Insert a clean probe thermometer between two pieces of dough and read the temperature.
3. Accept the delivery if both readings are –15 °C or colder. If either reading is warmer than –15 °C, refuse the affected product and write the reading on the driver's delivery note.
4. Sign the delivery note and move the cases into your freezer within 15 minutes.

Note. Refused product is replaced free of charge on the next scheduled delivery.

4. Storage

Store CafeReady in a freezer at –18 °C or colder. Unopened, the dough keeps for 120 days from the production date. Once a case is opened, close the inner bag tightly and use the remaining pieces within 30 days. Use the oldest batch first. Thawed dough must never be refrozen: if pieces have been thawed and not baked within 24 hours, throw them away.

5. Thawing and proofing

Most complaints about flat or greasy croissants come from proofing that was too warm.

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

1. The evening before, place the frozen pieces on a lined tray, leaving 5 cm between pieces.
2. Cover the tray loosely and thaw overnight in a chiller at 2–5 °C for 8 to 10 hours.
3. Move the tray to a proofer set at 26–28 °C and 75 % humidity.
4. Proof the croissant and pain au chocolat for 90 to 120 minutes. Proof the Danish swirl for 120 to 150 minutes (in Version 2 this was 100 to 130 minutes).
5. The dough is ready when the pieces have roughly doubled in size and wobble slightly when the tray is moved.
6. Brush gently with egg wash just before baking.

Note. Never proof above 30 °C. At that temperature the butter layers melt into the dough, and the pastry bakes flat and greasy.

6. Baking

Preheat the oven fully. Times are for a full tray. Bake until the pastry is deep golden brown on top and underneath.

- **Convection oven:** croissant and pain au chocolat at 165 °C for 16 to 18 minutes; Danish swirl at 160 °C for 20 minutes.
- **Deck oven:** croissant and pain au chocolat at 180 °C for 18 to 20 minutes; Danish swirl at 175 °C for 22 minutes.

Let the pastries cool on the tray for at least 10 minutes before display.

7. Ordering and delivery

Place orders on the OvenLink partner portal or through your account manager. The order cut-off is 14:00, two working days before your delivery day. Later orders move to the next delivery day on your route.

- **Minimum order:** 6 cases per delivery, which may be mixed across products. Until 31 July 2026 the minimum was 4 cases.
- **Delivery days:** Chiang Mai city routes on Tuesday and Friday; Lampang and Lamphun on Wednesday; Chiang Rai on Thursday.
- **Delivery fee:** 350 baht for orders of 6 to 9 cases. Delivery is free for orders of 10 cases or more.

8. Quality claims

Report quality problems such as misshapen pieces or missing chocolate batons within 48 hours of delivery. Submit the claim in OvenLink under "Quality claim" with the batch code, the number of affected pieces and at least two photos. Keep the affected pieces in the freezer until we tell you they can be thrown away, because we may collect them for testing. Approved claims are credited on your next invoice. For any question, contact Pimchanok Lertsiri, Partner Support Manager, at partners@ovenrise.example or 053 552 418 (Monday to Saturday, 07:00–16:00).
