Minutes of Pollination Services Committee Meeting No. 4/2026

Pa Sang Highland Bee Growers' Cooperative, Pa Sang, Lamphun · Ref. PSC-04/2026 · Meeting of 22 September 2026

Venue: Cooperative office, Meeting Room 2, 13:30–16:10. **Present:** Sompong Thammachak (Chair), Nattaya Saenwong (Pollination Coordinator), Wirat Phuangkaew (Treasurer), Duangporn Kaewprasert (Secretary, minutes), Chaiwat Bunyuen and Orathai Mueangkham (member representatives). **Guest:** Prasit Rungruangchai, representing the Ban Nong Lang Longan Growers' Group (for items 3 and 4). **Apologies:** Surasak Thipmanee (Hive Health Officer), who sent a written report for item 5.

1. Previous minutes

The minutes of meeting PSC-03/2026 of 14 July 2026 were adopted with one correction: the number of member beekeepers who joined the 2026 rental scheme was 41, not 44 as written.

2. Review of the 2026 longan flowering season

Nattaya Saenwong reported on the season that ran from late January to mid-March 2026. The cooperative placed 1,180 hives at 37 longan orchards in Pa Sang and Ban Hong. On 19 February 2026, 64 hives at one orchard in Tha Tum were lost after an insecticide was sprayed in the morning without notice. The orchard paid compensation at the 2026 rate of 1,800 baht per hive, a total of 115,200 baht, which was passed in full to the two members concerned. It was the only spray loss of the season.

3. Hive rental fees for the 2027 season

For the 2026 season the fee was 450 baht per hive for the whole flowering period. After discussion with Prasit Rungruangchai, the committee **agreed the following fees for the 2027 season**:

- Standard colony (at least 8 full frames of bees, laying queen): 520 baht per hive per season.
- Nucleus colony (5 to 7 frames of bees): 380 baht per hive per season, offered only to orchards smaller than 5 rai.
- Minimum order: 10 hives per orchard. Orders of 100 hives or more receive a 5% discount on the rental fee.
- Transport: free within 25 km of the cooperative office; beyond that, 12 baht per km for each one-way trip, charged per truckload, not per hive.

Payment terms: a deposit of 30% of the rental fee is due by 15 December 2026 to confirm the booking. The balance is due within 14 days after the hives are collected. Bookings without a deposit by 15 December may be released to the waiting list. The deposit is calculated on the rental fee only, not on transport.

> **Note.** A request to pay the deposit in two parts was not accepted for 2027.

4. Spray notification and compensation rules

The committee **adopted revised spray rules**, which will be added to the 2027 rental agreement as Clause 9. During the rental period, from the day the hives arrive until the day they are collected:

1. The orchard must notify the Pollination Coordinator by phone or LINE message at least 48 hours before any insecticide spraying. The coordinator then arranges for the beekeeper to close or move the hives.
2. Any spraying may take place only after 18:00, when foraging has stopped.
3. Insecticides from the cooperative's red list (Annex B of the agreement) must not be used at all during flowering, even with notice.
4. Exception: fungicide-only sprays from the cooperative's approved green list need 24 hours' notice instead of 48 hours. The 18:00 rule still applies.

If hives are lost or seriously weakened because these rules were not followed, the orchard pays compensation of 2,200 baht per hive (raised from 1,800 baht). A hive counts as seriously weakened if it has fewer than 4 frames of bees when inspected within 3 days of the incident. Compensation claims must be sent in writing within 7 days of the incident.

5. Hive placement, inspection and allocation

Surasak Thipmanee's written report was read out. Every hive offered for rental will be inspected between 5 and 20 January 2027 and marked with a yellow tag if it meets the standard colony rule; hives that fail are offered as nucleus colonies or withdrawn. Placement at orchards will start on 25 January 2027, or earlier if at least 10% of the orchard's flower panicles are open. Collection is planned for the week of 15 March 2027 but follows the actual end of flowering.

Members who wish to take part must register their hives with the Pollination Coordinator by 30 November 2026. Orchards are allocated first to members who took part in 2026 with no unresolved inspection failures, then in order of registration. No member may supply more than 120 hives to the scheme.

6. Longan honey intake price

Honey extracted from rented hives remains the property of the member. The committee agreed that for the 2027 longan harvest the cooperative will buy longan honey at 148 baht per kg if moisture is 20.0% or lower, and 126 baht per kg if moisture is above 20.0% and up to 21.5%. Honey above 21.5% moisture is not accepted. The 2026 price was 135 baht per kg.

7. Action points

- Send the 2027 rental agreement with Clause 9 and Annex B to all orchards by 20 October 2026: Nattaya Saenwong.
- Open the hive registration list for members and send a reminder on 1 November 2026: Duangporn Kaewprasert.
- Prepare deposit invoices and the payment account details by 1 December 2026: Wirat Phuangkaew.

Next meeting: Thursday 3 December 2026, 13:30, Meeting Room 2.
