Internal Memo: New Procedure for Seal Mismatches at the In-Gate

Pak Phanang Bay Container Terminal Co., Ltd. (PBCT), Nakhon Si Thammarat · Ref. SEC-MEMO-2026-07 · 14 September 2026

To: Gate clerks, yard checkers and shift supervisors
From: Sirintra Chaowalit, Terminal Security Manager (Room S-104, ext. 2104)
Copy: Weerapong Thongmee, Gate Operations Supervisor; Benjawan Phromsuk, Customs Liaison Officer
Subject: Seal mismatch holds, effective Monday 21 September 2026

1. Decision

From 06:00 on Monday 21 September 2026, any full export container whose seal number does not match the number in its GateTrack booking will no longer be let into the stacking yard. It goes to the new Seal Hold Lane, Lane H2 beside the Gate 2 canopy (space for 6 trucks). Until now, gate clerks could accept a mismatch with a remark in GateTrack; that practice ends on 20 September.

2. What the gate clerk does

1. Compare the seal number on the container door with the number in GateTrack.
2. If the numbers differ, or the seal is broken or missing, set the status "SEAL HOLD" in GateTrack and take two photos of the door, one a close-up of the seal.
3. Direct the driver to Lane H2 and give the driver the yellow hold slip.
4. Call the duty shift supervisor on radio channel 4 within 10 minutes.

3. Who decides what

- **Release of a hold:** only the duty shift supervisor may release a SEAL HOLD, after the shipper or its agent sends a corrected seal number by e-mail to gate@pbct-terminal.co.th.
- **Broken or missing seals:** the supervisor may not release these. Benjawan Phromsuk informs the customs office and arranges an inspection before any new seal is fitted.
- **Lane H2 capacity and truck queues:** Weerapong Thongmee decides when trucks queuing for H2 must leave and return later.

4. Time limits and charges

A truck may wait in Lane H2 for up to 3 hours. If the hold is not released by then, the truck leaves with the container and books a new GateTrack slot. A one-time hold fee of 600 baht per container is charged to the shipper if the hold lasts more than 1 hour; holds released within the first hour are free.

Note. Reefer containers are an exception to the 3-hour limit. They may stay in Lane H2 for up to 6 hours, plugged into the two power points at the end of the lane.
