Notice to Tapping Households: 2026 Wintering Rest, Rest-Period Advance and Tapping Resumption

Thung Yao Rubber Estates Co., Ltd., Huai Yot, Trang · Ref. TYRE-FN-2026-03 · Issued 19 January 2026

To: All contract tapping households on Blocks A to G
From: Pornthip Chuaykliang, Estate Manager

1. Why tapping stops

Tapping while the trees shed and regrow their leaves in the dry months weakens them and increases the risk of tapping panel dryness, so the estate stops all tapping during wintering. This year the rest is longer for the older blocks because the field survey on 12 January found heavy leaf fall in Blocks D, E and F.

2. Rest-period dates by block

- **Blocks A, B and C:** last tapping day Saturday 7 February 2026; tapping resumes Monday 16 March 2026.
- **Blocks D, E and F:** last tapping day Saturday 31 January 2026; tapping resumes Monday 23 March 2026.

In 2025 all six blocks stopped on the same day, 10 February, and resumed on 17 March. Latex and cup lump will be received at the collection sheds until 10:00 on the day after the last tapping day of each block. After that, the sheds stay closed until the first tapping day after the rest.

Note. Young trees in their first or second year of tapping are exempt from the rest period. This applies only to the trees opened for tapping in 2024 or 2025, which are the new section of Block C (rows C-41 to C-68) and all of Block G. Households on these rows may continue tapping on the normal alternate-day schedule, but only after the field supervisor has written "rest exempt" in the household's tapping book. Households on all other rows of Block C follow the Block A to C dates above.

3. Rest-period advance

Each contract household may request a rest-period advance. The advance is interest free and is repaid from latex payments after tapping resumes.

- **Amount for Blocks A to C:** up to 4,500 baht per household.
- **Amount for Blocks D to F:** up to 6,000 baht per household, because their rest is two weeks longer.
- **Repayment:** deducted in equal parts from the first four fortnightly latex payments after tapping resumes.
- **Eligibility:** households with a contract signed before 1 October 2025 and no unpaid balance from the 2025 advance.

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

Rest-exempt households (see the note in Section 2) keep their tapping income and therefore cannot request the advance.

How to request the advance

1. Collect the advance request form (form TY-ADV-26) from the estate office or from any collection shed supervisor.
2. Fill in the household head's name, block and row numbers, and the bank account for the latex payments. The household head must sign it.
3. Hand the form, with a copy of the household head's ID card, to Saowanee Thipchai, Tapper Welfare and Payroll Clerk, at the estate office, Room 4, between 08:30 and 15:30 on weekdays. The last day to submit is Friday 30 January 2026.
4. The advance is paid by bank transfer on Thursday 5 February 2026 for all approved requests. Households whose request is rejected are told by phone before that date.

4. Work during the rest period

Tapping households are not required to work during the rest. Paid day work is offered to adults of contract households who wish to earn extra income:

- **Weeding and firebreak clearing:** 380 baht per day, from 9 February to 6 March 2026, starting at 07:00 at the estate workshop.
- **Latex cup and spout cleaning:** 350 baht per day, from 2 March to 13 March 2026, at the Block B collection shed.

Names for day work are taken by the shed supervisors until 4 February 2026. Each person may work a maximum of 15 days in total across both activities.

5. Before tapping resumes

No household may restart tapping until its rows have passed a panel inspection. The inspection checks the tapping panels for dryness and bark disease, the condition of the cups, spouts and hangers, and the household's tapping knife. Anucha Kaeosuwan, Senior Field Supervisor, leads the inspection team.

- **Blocks A to C:** inspection from 9 March to 13 March 2026.
- **Blocks D to F:** inspection from 16 March to 20 March 2026.

The household head or another adult tapper from the household must be present when the team inspects its rows. A household that misses its inspection date must phone the field office on 075 291 448 to book a new date, and cannot resume tapping until the inspection is completed. Trees marked with a yellow ring of paint show signs of panel dryness. They must not be tapped until the field supervisor removes the mark, which normally takes one to three months.

6. First weeks after resumption

For the first two weeks after resumption, tapping is every third day instead of every second day, so that the new leaves can mature. Stimulant may not be applied to any panel until 20 April 2026.
