Nong Lom Chatbot: Rules of Use and Handover Policy

Jomtien Crest Residences Management Co., Ltd. · Ref. JCR-POL-2026-07, version 2.0 · Approved by the Management Committee on 18 August 2026 · Effective 1 September 2026

1. Purpose and scope

Jomtien Crest Residences Management Co., Ltd. ("the Management Office") manages the four condominium buildings of Jomtien Crest Residences on Thappraya Road, Jomtien, Chon Buri: Buildings A (Sea Wing), B (Garden Wing), C (Hill Wing) and D (Studio Wing), with 1,186 units in total. Since 3 February 2025 it has used an automated chatbot, Nong Lom, to answer routine questions and register maintenance requests.

This policy sets out what Nong Lom may and may not do, when a conversation must be handed to staff, and how records are kept. It applies to owners, registered tenants, and household members aged 15 or over who are listed on the unit's resident card. It also applies to all Management Office staff who read or act on chatbot records. Version 2.0 replaces version 1.3 of 10 January 2025.

2. Where Nong Lom is available

Nong Lom can be reached 24 hours a day through three channels:

- the Jomtien Crest official LINE account;
- the chat window in the Resident Portal;
- the touch-screen kiosk in the lobby of Building B, next to the parcel room.

Nong Lom answers in Thai, English, Russian and Simplified Chinese. A resident may switch language at any time by typing "language" followed by the language name. Voice messages are not processed.

To use any service that concerns a specific unit, the resident must first link their LINE or portal account to their unit with the one-time code printed on the resident card. Without a linked account, Nong Lom gives general information only.

3. Services Nong Lom may provide

Within its approved scope, Nong Lom may:

1. answer questions using only the approved knowledge base, which consists of the House Rules (2026 edition), the Common Facilities Guide, published notices, and the fee schedule approved by the Annual General Meeting;
2. register maintenance requests for common areas and for unit faults covered by the Management Office, and give the resident a request number in the format MR-2026-00000;
3. book the meeting room on the 2nd floor of Building A, the barbecue terrace and the guest parking bays, subject to the booking rules in the Common Facilities Guide;
4. notify residents of parcels received;
5. issue a statement of the common fee balance and a QR code for payment to the juristic person's bank account;

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

Every answer about rules or fees must show the source (for example "House Rules, rule 4.2") so that the resident can check it. If the knowledge base has no answer, Nong Lom must say so and offer a handover to staff. It must not guess.

4. Things Nong Lom must not do

The following actions are reserved to staff and are blocked in the chatbot:

- waive, reduce or postpone the common fee, the sinking fund contribution or any late-payment surcharge;
- approve renovation works, the use of the service lift for moving furniture, or access for contractors outside the permitted working hours of 08:30 to 17:00, Monday to Saturday;
- release CCTV recordings, or confirm whether a particular person entered the building;
- share another resident's name, phone number, unit number or vehicle registration.

For these requests Nong Lom opens a handover (section 5) or gives the correct form.

> **Note.** Nong Lom can show a resident the late-payment surcharge that applies to their own account, but only the Resident Services Manager, Ms Saowalak Rattanaporn, may approve a waiver, and only in writing after a request on form JCR-F12.

5. Handover to staff

5.1 When a handover is mandatory

Nong Lom must stop answering and transfer the conversation to a person in any of the following cases:

- the resident types "staff", "human" or "เจ้าหน้าที่", or asks for a person in any supported language;
- the message describes an urgent safety situation: fire or smoke, a gas smell, water leaking into another unit or into an electrical room, a person trapped in a lift, a medical emergency, or a threat of violence;
- the resident has asked the same question three times without a satisfactory answer;
- the message is a formal complaint about a staff member, a contractor or the security team;

5.2 Urgent safety messages

For urgent safety messages Nong Lom immediately shows the 24-hour security control room number (038 251 400, extension 1) and sends an alert to the control room screen and to the on-duty building engineer. The control room must call the resident back within 5 minutes. Nong Lom always tells the resident to call 191 or 1669 first if there is danger to life. Urgent messages are never placed in the normal queue.

5.3 Normal handovers and response times

Non-urgent handovers go to the Resident Services team. During office hours (Monday to Saturday, 08:00 to 19:00) a staff member must reply within 30 minutes. Handovers received outside office hours, or on Sundays and public holidays, must receive a reply by 10:00 on the next working day. Until 31 August

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

2026 the office-hours target was 60 minutes; it was shortened when the team was increased from three to five officers.

6. Conversation records and personal data

Conversations are handled under the Privacy Notice (version 4, May 2026). The Data Protection Officer, Mr Chaiwat Phongsri, is responsible for the retention rules in this section.

- **Text of conversations:** kept for 180 days from the last message, then deleted automatically. Under version 1.3 this period was 1 year.
- **Photos and videos sent with maintenance requests:** kept for 90 days after the request is closed.
- **Records linked to a complaint, an insurance claim or an incident report:** kept for 2 years after the case is closed, and then deleted.

Residents must not send ID card images, passport pages or bank card details through Nong Lom. If such an image is received, Nong Lom warns the resident and the image is deleted within 24 hours. Documents that require ID must be submitted at the counter on the ground floor of Building B.

7. Quality checks

Every month, the Resident Services Manager reviews a random sample of 150 conversations, of which at least 20 must be in English, Russian or Chinese. An answer counts as correct if it agrees with the approved knowledge base and gives the right source. The target is at least 95 % correct answers. If the result falls below 90 % in any month, the Management Office restricts Nong Lom to registering maintenance requests and bookings, and stops free-text answers about rules and fees, until the knowledge base has been corrected and a new sample of 50 conversations reaches 95 %.

8. Residents' rights and opting out

Using Nong Lom is optional: the same services are available by phone, by e-mail or at the counter. A resident who does not want their conversations kept for quality checks may type "no review" at the start of a conversation; that conversation is then excluded from the monthly sample, although it is still kept for the normal retention period in section 6.

9. Complaints and review of this policy

Complaints about Nong Lom, including wrong answers that caused a missed booking, may be made on form JCR-F14 at the counter or by e-mail. The Resident Services Manager replies within 7 working days. If the complaint concerns personal data, it is passed to the Data Protection Officer, who replies within 15 days.

The Management Committee reviews this policy every year in August, or earlier if Nong Lom is given a new service. Changes are announced on the LINE account at least 14 days before they take effect.
