TERMS AND CONDITIONS FOR THE SALE OF COCOA BEAN SHELL AND WINNOWING FINES

Ref. OCP-COM-TC-07, version 3 · Effective 1 November 2026 · Supersedes version 2 of 4 March 2025

1. SCOPE AND BUYERS

These terms cover ex-works sales from our Kaase plant of coarse cocoa bean shell (grade **CS-1**) and winnowing fines (grade **WF-2**) to holders of a registered buyer account (form OCP-B4, renewed every 12 months). Products are sold as is, not for human food, and may not be resold without written consent. We do not deliver; buyers collect at Gate 3.

2. PRICES AND CHARGEABLE WEIGHT

Base prices are per tonne at the reference moisture of 8.0 % and exclude VAT and levies: CS-1 **GHS 640.00** per tonne (GHS 560.00 until 31 October 2026) and WF-2 **GHS 410.00** per tonne. Wet product is charged on a moisture-corrected weight:

$$W_c = W_n \times \frac{100 - M}{100 - M_{ref}} \tag{1}$$

where W_c is the chargeable weight (t, to 0.001 t), W_n the net weighbridge weight (t), M the measured moisture (% wet basis) and M_{ref} = 8.0 %. If M is 8.0 % or lower, $W_c = W_n$ (no premium for dry product).

$$A = W_c \times p \times \left(1 - d\right) + H \tag{2}$$

where A is the invoice amount before VAT (GHS), p the base price per tonne, d the volume discount (0 below 40 t, 0.05 from 40 t, 0.08 from 100 t collected in the calendar month, current load included) and H = GHS 85.00 per vehicle loaded by our front loader (nil if the buyer hand-loads bagged product).

Worked example. A mushroom grower collects 12.40 t net of CS-1 at 11.5 % moisture, its collections that month reach 46 t, and we load the truck. W_c = 12.40 × 88.5 / 92.0 = 11.928 t, so A = 11.928 × 640.00 × 0.95 + 85.00 = **GHS 7,337.22** before VAT.

3. COLLECTION, PAYMENT AND CLAIMS

Book collections with Yaw Boakye-Danquah, Weighbridge and Dispatch Supervisor (+233 32 202 4431), Monday to Friday 07:00–15:30 and Saturday 07:00–11:00; vehicles of at most 15 t payload, fully tarpaulined. Collect within 3 working days of the pro-forma invoice, then GHS 12.00 per tonne per working day is charged. Payment is in advance by bank transfer or mobile money. The laboratory keeps a sealed 2 kg sample of each load for **21 days**. Written claims are accepted within 48 hours of collection. A disputed moisture result is retested on that sample by an independent laboratory; the buyer pays the retest unless the result differs from ours by more than 1.0 percentage point, in which case we pay and re-invoice.

> **Exception.** Alkalising-line fines (grade WF-2A) are sold only to biomass boiler operators, never to feed mixers, at the WF-2 price.

Approved for the Company: **Abena Owusu-Ansah**, Commercial Manager, Owabi Cocoa Processors Ltd
