# Notice to Patients: Repeat Prescriptions Move to PillPost Medicine Lockers

Chok Khao Community Health Clinic, Mueang Lamphun · Notice No. CKC-PN-2026/07 · Issued 5 October 2026

Dear patients and carers, from **Monday 2 November 2026** most repeat prescriptions at Chok Khao Community Health Clinic will be collected from the new PillPost medicine lockers instead of the pharmacy counter. Please keep this notice with your blue medicine book.

## 1. What is changing

Until Saturday 31 October 2026, repeat prescriptions are collected at Pharmacy Window 3 from Monday to Saturday, 08:00 to 16:00. From 2 November 2026, enrolled patients will instead collect from the PillPost lockers at the east entrance of the clinic, next to the blood-pressure self-check kiosk. The lockers can be opened every day from 06:00 to 22:00, including Sundays and public holidays.

The bank has 48 standard compartments and 8 refrigerated compartments kept between 2 and 8 °C for insulin and other cold-chain medicines. Using the lockers is free of charge. Window 3 stays open for new prescriptions and patients who are not eligible.

## 2. Who can use the lockers

You may enrol if you are a registered patient of the clinic, aged 18 or over, and you have a repeat prescription for a long-term condition such as high blood pressure, type 2 diabetes, high cholesterol, asthma or an under-active thyroid. Your dose must have been unchanged for at least 6 months on the date you enrol.

The following cannot be placed in a locker and must still be collected at Window 3:

- controlled medicines, including strong pain medicines and sleeping tablets;
- warfarin and other medicines that need a blood test result before each supply;
- the first supply after any change of medicine or dose;
- bulky items such as nebuliser machines, dressing packs or boxes heavier than 5 kg.

Insulin pens and other refrigerated medicines may be placed in a refrigerated compartment, but they must be collected within 24 hours of the text message, not the 72 hours that apply to standard compartments.

## 3. How to enrol

Enrolment opens on Monday 12 October 2026. Enrol at the Patient Liaison Desk in Room 104, Monday to Friday 08:30 to 15:30, or by telephone on the clinic line 053 510 274, extension 2. To enrol you need your Thai national ID card (or pink card for non-Thai residents), a mobile number that can receive text messages, and a signed consent form PP-1.

Patients who enrol by Friday 23 October 2026 will receive their first locker supply in November. Later enrolments move to the lockers from the next refill after confirmation.

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

## 4. Ordering and collecting your medicines

1. Order your refill at least 5 working days before your current supply runs out, by refill slip, phone or the drop box at the east entrance.
2. A pharmacist checks and packs your medicines in a sealed, labelled bag.
3. You receive a text message with the locker number and a 6-digit collection code. The code is valid for 72 hours from the time the message is sent.
4. At the locker screen, enter the 6-digit code followed by the last 4 digits of your ID card. The compartment door opens for 30 seconds.
5. Check the label and the seal before you leave. If the seal is broken, leave the bag in the compartment and contact the pharmacy (Section 7).

A lost code can be resent by calling extension 2, at most 2 times per order.

## 5. Uncollected medicines

When a code expires, the pharmacy removes the bag on the next working morning. You can still collect it at Window 3 within 14 days; after 14 days the medicines are returned to stock and you must order again. A patient who misses 2 locker collections within any 3-month period is moved back to counter collection at Window 3 for 6 months, after which they may enrol again. Collections missed because of a locker fault reported to the clinic do not count.

## 6. Collecting for someone else

Each patient may register one carer to collect on their behalf. The carer must be 18 or over, must come to Room 104 with both ID cards, and must sign form PP-2 together with the patient. The carer receives a separate code on their own mobile phone. One carer may be registered for at most 3 patients.

## 7. Medicine reviews and contacts

Using the lockers does not replace your medicine review. Every patient using PillPost must attend a review with a pharmacist in Room 108 at least once every 6 months. If a review is more than 30 days overdue, locker supplies are paused and your next refill is prepared for Window 3, where staff will book your review.

- **Wrong, missing or damaged medicines in a locker:** Ms Jirawan Saelim, Head Pharmacist, who is responsible for everything placed in the lockers. Call extension 3 during clinic hours.
- **Enrolment, consent forms and carer registration:** Ms Supaporn Inkaew, Patient Liaison Nurse, Room 104, extension 2.
- **Locker screen or door faults:** press the red help button on the locker bank; outside clinic hours the call goes to the security office at the main gate.
- **Comments and complaints about the new service:** Mr Natthapong Kamkaew, Clinic Manager, in writing at the reception desk.

**Natthapong Kamkaew**, Clinic Manager, Chok Khao Community Health Clinic
