Return of Loaned PureDrum Purifiers and Generators After the 2026 Mun River Flood Response

Saeng Thian Relief Foundation, Ubon Ratchathani · Operations Notice OPS-N-2026-31 · Issued 1 October 2026

To: village volunteer coordinators and partner sub-district relief teams in Warin Chamrap, Det Udom, Phibun Mangsahan and Sawang Wirawong districts that borrowed equipment during the 2026 flood response.

The emergency phase of the Foundation's 2026 Mun River flood response closes on 31 October 2026. During the response, the Foundation lent 146 PureDrum 60 portable water purifiers and 38 portable petrol generators to 61 villages.

1. Where and when to return equipment

All equipment is returned to the **Warin Chamrap Field Depot, Warehouse B, Gate 3**. The return window runs from **13 October to 7 November 2026**. The depot receives returns Monday to Saturday, 08:30–16:00; it is closed on Sundays and on 23 October 2026 (Chulalongkorn Day).

Until 30 September 2026, returns were taken at the temporary collection point in the Det Udom school gymnasium. That point is now closed.

2. Preparing a PureDrum 60 for return

1. Note the reading on the litre counter on the side of the drum and write it on the orange return tag that came with the unit.
2. Drain all water from the drum and the outlet tap.
3. Flush the unit by pumping 10 litres of clean water through it, then drain again.
4. Leave the lid and tap open to air-dry for at least 24 hours in the shade.
5. Pack the hand pump handle, pre-filter sock and lid strap inside the drum.

Do not open the sealed cartridge housing yourself. The membrane cartridge in each PureDrum 60 is rated for 20,000 litres. Depot staff will read the counter, and any unit that shows more than 18,000 litres will have its cartridge replaced free of charge before the next season.

3. Returning generators

Generators must be returned with no more than a quarter tank of petrol, with the oil cap in place and the extension cable reel included. Excess fuel is drained by the depot and not paid back. A generator that has stopped working should be returned as it is, without home repairs.

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

4. Deposits and charges

Villages paid a refundable deposit when they borrowed equipment: 1,500 baht per PureDrum 60 and 3,000 baht per generator. The deposit is refunded by bank transfer to the village fund account within 15 working days after check-in. If parts are missing, the following amounts are deducted from that unit's deposit:

- Hand pump handle: 350 baht
- Pre-filter sock: 120 baht
- Lid strap: 80 baht
- Cartridge housing cracked or opened: 900 baht
- Generator extension cable reel: 450 baht

Normal wear and mud stains are not charged. A purifier or generator that is lost or not returned by 7 November 2026 is treated as lost: its deposit is kept and the village is invoiced an additional 4,500 baht per purifier or 9,000 baht per generator.

5. Extension for villages still under a water advisory

Some villages are still on the Foundation Health Desk's water-safety advisory list. These villages may keep their PureDrum 60 units until **15 December 2026**. To do this, the coordinator must submit Form KR-7 (Equipment Loan Extension) to the Health Desk by **31 October 2026**. An extension covers at most 2 purifiers per village; any further purifiers the village holds must be returned in the normal window. Generators cannot be extended under any circumstances.

Note. A village that is removed from the advisory list during the extension must return its purifiers within 10 working days of being notified, even if this is before 15 December 2026. Form KR-7 submitted after 31 October 2026 will not be accepted, and the units must then be returned by 7 November 2026.

6. Collection by Foundation truck

A village may ask the Foundation to collect its equipment if the village is more than 40 km by road from the depot, or if it is returning 5 or more items (purifiers and generators counted together). Collection runs on Tuesdays and Thursdays only and must be booked with the logistics desk at least 3 working days before the collection day. A named volunteer must be present to sign the check-in sheet.

Coordinators who bring equipment to the depot themselves may claim a travel allowance of 4 baht per kilometre for the round trip, up to 600 baht per return trip. It is paid with the deposit refund.

7. Contacts

Bookings for collection, deposit questions and lost-equipment reports: Equipment Logistics Coordinator Wannapa Sirisombat, telephone 045-311-782 (Monday to Friday, 08:30–17:00) or LINE @saengthian-ops. Check-in on the day: Depot Manager Kiattisak Duangkaeo, Warehouse B.
