Pond Share Programme: Terms and Conditions for Neighbouring Farmers

Khao Sawang Solar Power Co., Ltd. · Khao Sawang Solar Farm, Sung Noen, Nakhon Ratchasima · Ref. KSS-POL-WTR-03, version 3.1 · Approved by the Site Management Committee on 12 September 2026 · Effective 1 November 2026

1. Purpose and scope

Khao Sawang Solar Power Co., Ltd. ("the Company") operates Khao Sawang Solar Farm, a 48 MW ground-mounted solar plant on 312 rai of land in Sung Noen District. The site has two retention ponds. The North Pond, with a design capacity of 64,000 cubic metres, collects stormwater from the array drains and the rinse water from panel cleaning. The South Pond is the site's fire-fighting reserve.

Under the Pond Share Programme, which began in the 2023/24 dry season, the Company lets registered neighbouring farmers draw surplus water from the North Pond. These terms explain who may join, how much water may be drawn, what it costs, and the safety rules on site. They apply to every registered farmer and nominated helper and to all Company staff who run the programme. Version 3.1 replaces version 3.0 of 2 October 2025.

Note. The South Pond is never part of the Pond Share Programme. No water may be drawn from it at any time, including during a drawing suspension at the North Pond.

2. Who may join

A farm may be registered if all of the following apply:

- the farmland lies within 3 km of the solar farm boundary fence, in Tambon Khorat or Tambon Na Klang;
- the applicant owns the land or holds a written lease for the whole drawing season;
- the applicant has no unpaid Pond Share invoice from an earlier season.

The programme accepts at most 40 registered farms per season. If more applications arrive, farms nearest the boundary fence are accepted first. Applications are taken from 1 to 20 October each year at the Community Relations Office, the single-storey building beside Gate 3. The applicant brings a copy of the national ID card, a copy of the title deed or lease, and a sketch showing where the water will be used.

Each accepted farm receives a numbered Pond Share card for the season. The card names the registered farmer and, if requested, one nominated helper. The nominated helper must be aged 18 or over and must sign the safety briefing sheet in person before the card is issued.

3. Drawing season, days and quotas

The drawing season runs from 1 December to 30 April. Outside the season the North Pond is kept for the Company's own use and no drawing takes place.

- Drawing days: Tuesday, Thursday and Saturday, 07:00 to 11:00. There is no drawing on public holidays.

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

- Drawing point: the metered standpipe SP-1 on the east bank of the North Pond. Farmers may not place their own pumps or hoses in the pond.
- Monthly quota: 20 cubic metres per rai of registered farmland. Only the first 15 rai of a farm count towards the quota, so no farm may draw more than 300 cubic metres in one calendar month.
- Single visit limit: 60 cubic metres per farm per drawing day.

Unused quota does not carry over to the next month. Until 30 April 2026 the monthly quota was 25 cubic metres per rai; it was reduced for the 2026/27 season because the Company now cleans the panels four times a year instead of three.

4. Pond level rules

The pond level is read on gauge post NP-2, next to standpipe SP-1, every day at 16:00. The reading decides the drawing status for the next drawing day:

- Level 2.4 m or higher: normal drawing with full quotas.
- Level below 2.4 m but at least 1.8 m: reduced drawing. Monthly quotas and the single visit limit are both halved.
- Level below 1.8 m: drawing is suspended. The remaining water is reserved for panel cleaning.

Any change of status is announced in the "Pond Share Khao Sawang" LINE group by 18:00 on the day of the reading and posted on the notice board at Gate 3. A suspension ends only when the level has been at 2.0 m or higher on three consecutive daily readings.

Exception for seedbeds. During reduced drawing, a farm that registered a rice seedbed or vegetable nursery on its application may still draw up to 45 cubic metres per drawing day for that seedbed, within its halved monthly quota. This exception does not apply during a suspension.

5. Fees and payment

- Registration fee: 300 baht per farm per season, paid when the card is issued.
- Water charge: 4 baht per cubic metre, as recorded by the SP-1 meter. Until 30 April 2026 the charge was 3 baht per cubic metre.
- Small farm allowance: farms with 5 rai or less of registered farmland pay no water charge for the first 50 cubic metres drawn in each month.
- Card replacement: 100 baht for a lost or damaged card.

The Company issues an invoice on the first working day of each month for the water drawn in the previous month. Payment is due by the 10th of that month, in cash at the Community Relations Office or by bank transfer quoting the card number. If payment is late, the card is blocked until the invoice is paid. A farm that pays late twice in the same season loses its card for the rest of that season.

6. Water quality and permitted uses

North Pond water is untreated. The Company rinses panels with plain water only and uses no detergents, but the water may contain dust, bird droppings and algae. The Water and Environment Supervisor sends

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

a sample to an independent laboratory in Nakhon Ratchasima every quarter, and the latest results are posted at Gate 3.

The water may be used for irrigating rice seedbeds, vegetables, field crops and fruit trees, and for watering cattle and buffalo. It may not be used for drinking or cooking, for filling household water jars, or for stocking fish ponds. Water may not be sold or given to farms that are not registered.

7. Access and safety on site

- Pond Share farmers enter and leave only through Gate 3 on the east side of the site, off the Sung Noen–Khorat road. They sign in at the guardhouse and show their card on every visit.
- Only the registered farmer or the nominated helper named on the card may draw water. Children under 12 may not enter the site.
- The speed limit inside the site is 20 km/h. Farm trucks and tractor trailers may weigh at most 6 tonnes loaded, because of the culvert on the access track.
- Visitors must stay on the access track and the east bank. Entering the fenced array area, swimming and fishing are forbidden.

Any accident, spill or damage to Company equipment must be reported to the guardhouse before leaving the site. Life ring stations are placed every 50 metres along the east bank.

8. Roles and responsibilities

- Site Manager, Pradit Wongsa: approves these terms each season, decides on suspensions and appeals, and may remove a farm for serious safety breaches.
- Water and Environment Supervisor, Sukhon Phetrat: reads gauge post NP-2 and the SP-1 meter, keeps the drawing log, and arranges the quarterly water tests.
- Community Relations Officer, Kanokwan Thepsiri: handles applications, issues and replaces Pond Share cards, runs the LINE group, and receives complaints.
- Finance Section: prepares the monthly invoices and records payments.

9. Complaints and appeals

A farmer who disagrees with a meter reading, an invoice or a decision to block or remove a card may submit a written complaint to the Community Relations Office within 14 days. The Site Manager gives a written decision within 10 working days. While a complaint about an invoice is open, the card stays active if the undisputed part of the invoice has been paid.

Community Relations Office: open Monday to Saturday, 08:00 to 16:30, telephone 044 118 760.
