KlaPhrom Seedling Tray and Transplanting Service: Dry Season 2027

Nong Kula Rice Farmers Cooperative Ltd., Bang Rakam, Phitsanulok · Leaflet Ref. NK-SV-2026-09 · Issued 28 September 2026

1. What KlaPhrom offers

KlaPhrom is the cooperative's service for members who want to switch from broadcasting seed to machine transplanting. The cooperative sows your rice in plastic seedling trays at its nursery behind the Nong Kula rice mill and then plants them in your field with one of its four walk-behind transplanters. Transplanted fields need less seed and are easier to weed.

You can book trays only or trays with machine transplanting. Transplanting is not offered without cooperative trays.

2. Varieties for the 2027 dry season

- **Nong Kula 3:** non-glutinous white rice, 115 days from sowing to harvest; our recommended dry-season variety.
- **Sai Thong 9:** non-glutinous, 105 days, for fields that must be harvested before the canal closes in late April.
- **Kula Niao 2:** glutinous rice, 120 days. Limited to 400 rai this season.

3. Tray prices

One rai needs 34 trays, which uses about 5 kg of seed instead of the 20 to 25 kg used for broadcasting.

- **Members:** 22 baht per tray, which is 748 baht per rai.
- **Non-members:** 27 baht per tray, which is 918 baht per rai, and trays only (no transplanting).

Until the end of the 2026 wet season the member price was 19 baht per tray. Trays remain cooperative property and must be returned within 7 days of planting; a missing or broken tray is charged at 45 baht.

4. Booking rounds

Seedlings are sown in three rounds. Transplanting takes place when the seedlings are 15 to 18 days old.

- **Round 1:** sowing on 5 January 2027, transplanting from 20 to 28 January.
- **Round 2:** sowing on 25 January 2027, transplanting from 9 to 17 February.
- **Round 3:** sowing on 15 February 2027, transplanting from 2 to 10 March.

Bookings for each round close 14 days before its sowing date. The minimum booking is 3 rai per member. Booking opens on 1 November 2026.

How to book

1. Bring your member book and the land document for each plot to the service counter.

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

2. Choose your variety, round and the number of rai for each plot.
3. Pay a deposit of 30 % of the tray cost. The rest of the tray cost and the transplanting fee are paid after planting, or can be added to your harvest account.
4. Collect your booking slip with your booking number.

Note. Members with an unpaid balance from the 2026 wet season fertiliser credit may book only after the balance has been paid or a repayment plan has been signed with the credit desk.

5. Machine transplanting

The transplanting fee is 550 baht per rai for members, which includes the operator and fuel. Plots of less than 2 rai are charged as 2 rai. Each machine plants about 12 rai per day.

The operator will phone you the evening before your plot is planted. If your field is not ready when the crew arrives, the plot goes to the end of the route and a return-visit fee of 300 baht is charged.

6. Using your own seed

Members may bring their own seed for tray sowing, but only if it passes a germination test at the cooperative's seed room (Room 3, next to the drying yard). The seed must be delivered at least 10 days before the sowing date of your round, and it must reach a germination rate of 85 % or higher. If it fails, the booking is changed to cooperative seed at the normal price. Own-seed trays cost 16 baht each.

7. Preparing your field for the transplanter

Please follow these steps:

1. Plough and puddle the field, then level it so that no part is more than 3 cm higher or lower than the rest.
2. On the day before planting, drain the field until there is 1 to 3 cm of water on the surface.
3. Clear an entry point at least 3 metres wide where the machine and the tray trailer can reach the field from the road or a bund.
4. Place a flag or a bamboo pole at each corner of the plot so the operator can find it.

8. Cancellations and weather

A booking can be cancelled with a full refund of the deposit up to 7 days before the sowing date. After that the deposit is not refunded. Once the seed is sown, the full tray cost is charged even if you cancel. If flooding prevents planting, your plot is rescheduled within 5 days at no extra charge.

9. Contact

KlaPhrom service coordinator: Wanida Chuenjai, service counter at the cooperative office, open Monday to Saturday from 08:00 to 16:30. Telephone 055 318 442. Crew line during transplanting windows: 089 641 2275, daily 06:00 to 18:00.
