Notice to Customers: Move to Shared Internet Addresses on Ruamsai Home Plans

Ruamsai Broadband Co., Ltd. · Customer Notice CN-2026-019 · Issued 1 October 2026

Ruamsai Home connections in Lamphun currently have their own public IPv4 address. Because no new addresses are available, Home 300 and Home 500 connections will move to a shared address (carrier-grade NAT). Browsing, streaming and video calls work as before; IPv6 does not change. Home 1000 Gamer connections keep their own public IPv4 address until at least 31 March 2027.

1. When the change happens

- Wave A, Mueang Lamphun and Ban Thi districts: the nights of 3 to 5 November 2026.
- Wave B, Pa Sang and Mae Tha districts: the nights of 17 to 19 November 2026.

Work takes place between 01:00 and 04:00. Your router will restart once and drop the connection for up to 10 minutes.

2. Who will notice a difference

You may be affected if you use port forwarding, view home CCTV through the camera's own address, run a home server or game server, or connect to your home network by VPN.

3. Keeping your own address: Ruamsai FixedPort

FixedPort is an add-on that keeps one dedicated public IPv4 address for your connection. It costs 99 baht per month. The price announced in August was 149 baht per month; that offer was withdrawn on 30 September 2026. Requests received by 25 October 2026 are free for the first two months and keep a public address without a break. Later requests are accepted, but your new dedicated address will differ from your current one.

To request FixedPort:

1. Open the Ruamsai app and go to Account, then Add-ons, then FixedPort.
2. Enter your customer number (it starts with "RS-") and the use you need the address for.
3. Confirm the request. You will receive an SMS with a reference starting "FP-" within 2 working days.

Note. Customers aged 65 or over and registered home-based shops using remote CCTV may ask for FixedPort free of charge for 12 months. These requests must be made by phone, not in the app.

4. Contacts and responsibilities

Ms. Ornanong Srisamai, Addressing Desk Lead, handles FixedPort requests, free-of-charge requests and any complaint about a lost address (addressing@ruamsai.example). Mr. Phatchara Duangjan, Head of Network Engineering, is responsible for the overnight schedule and decides whether a wave is postponed. Customer Care is available every day from 08:00 to 22:00 on 053 555 210.
