Living Next to the Cannery: Neighbour FAQ for the 2026/27 Winter Pineapple Season

Thung Pradu Canning Co., Ltd., Kui Buri, Prachuap Khiri Khan · Ref. TPC-COM-2026-07 · Issued 1 October 2026

This FAQ is for residents of Ban Thung Pradu, Ban Nong Hin, Ban Khao Lan and other households near our factory on the Kui Buri–Thung Pradu road. It explains what changes during the winter pineapple season, how to report a problem, and how to use the Thung Pradu Neighbour Fund and the free peel scheme.

1. When is the winter season and what changes?

The winter season runs from Monday 2 November 2026 to Friday 15 January 2027. During these ten and a half weeks the factory runs two shifts, from 05:00 to 13:00 and from 13:00 to 21:00, six days a week. There is no production on Sundays. Outside the season we run one day shift only, from 07:00 to 16:00, Monday to Friday.

2. Which roads will the fruit trucks use, and at what times?

All contracted fruit trucks must enter from Phetkasem Road (Route 4) by the new access road opened in August 2026 and use Gate 1 only. Trucks may not drive through Ban Nong Hin village. Trucks may queue on the access road from 04:30, and the weighbridge opens at 05:00. The last truck is accepted at the weighbridge at 19:30.

Finished-goods trucks taking canned fruit to Laem Chabang port leave by Gate 2 between 08:00 and 18:00 only, so no container lorries pass the Ban Thung Pradu school during morning drop-off (07:00 to 08:00).

> **Note.** Until the access road opened, trucks used the Ban Nong Hin road and were allowed to queue from 03:30. That arrangement has ended. A truck seen in Ban Nong Hin, or queuing before 04:30, is breaking its contract with us and should be reported (see question 4).

3. Why does the area smell during the season, and what are you doing about it?

The smell comes mostly from peel and core that waits in the peel yard before it is taken away, and from the first wastewater pond. For the winter season we have made three changes:

- The peel yard is now emptied at least every 6 hours, instead of once per shift.
- A roof and side screens have been added to the peel yard on the side facing Ban Khao Lan.
- Two extra aerators have been installed in wastewater pond 1, bringing the total to six.

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

4. How do I report noise, smell or a truck problem?

You can contact the factory at any hour during the season. Please give the time, the place and, for a truck, the number plate.

- **Neighbour hotline:** 032 618 455, answered 24 hours a day from 2 November 2026 to 15 January 2027, and from 07:00 to 17:00 on weekdays at other times.
- **LINE:** add the official account @tpcneighbour and send a message or photo.

During the season, a duty supervisor will call you back within 2 hours of a report made between 21:00 and 05:00, and within 1 hour at other times. Our Community Liaison Officer, Ms Wanphen Ratchamanee, follows up every report in writing within 3 working days and explains what was done. A truck reported for using the Ban Nong Hin road receives a written warning; after a second report in the same season the transport company is suspended from deliveries for 7 days.

5. Who can apply to the Thung Pradu Neighbour Fund?

The Thung Pradu Neighbour Fund supports small household and community projects near the factory. For 2027 the company has set aside 1,800,000 baht. Applications for the first round are open from 2 November to 30 November 2026, and decisions are announced on 15 January 2027.

- **Households:** households whose house registration address is within 1.5 km of the factory boundary may apply for up to 15,000 baht, once per year, for a home or livelihood project (for example window screens or a water tank).
- **Community groups:** village committees, temples, schools and registered community enterprises in Thung Pradu Subdistrict may apply for up to 60,000 baht per project.

Note. Households living more than 1.5 km from the factory are also eligible if their house stands within 200 m of the old Ban Nong Hin truck road, because they lived with truck traffic until August 2026. Until 2025 the household limit was 10,000 baht and the distance limit was 1 km.

Application forms are available at the Community Liaison Office and the subdistrict office. Each form must be signed by the village head. Employees of Thung Pradu Canning and members of the fund committee may not apply for a household grant.

6. Can I take pineapple peel for my animals?

Yes. Livestock farmers in Kui Buri District can collect fresh peel and core free of charge after registering once at the Community Liaison Office with a copy of their ID card and their livestock registration. Each registered farmer receives a yellow collection card.

- Collection is at Gate 3, from 09:00 to 15:00, Monday to Saturday during the season.
- Each card holder may take up to 400 kg per day, weighed at the Gate 3 scale.
- Farmers must bring their own covered containers or a pick-up truck with a tarpaulin. Uncovered loads are refused.

Peel must not be resold. A card used for resale is cancelled for the rest of the season.
