VeilGrind Witnessed Destruction Service: Terms and Conditions for Brand Owners

Thung Lung Polymer Reclaim Co., Ltd. · Hat Yai Plant, Songkhla · Ref. TLPR-TC-VG-03 · Version 3.0 · Effective 1 November 2026

1. Purpose and scope

VeilGrind is the witnessed destruction service of Thung Lung Polymer Reclaim Co., Ltd. It allows brand owners, contract packers and importers to have branded plastic packaging and products destroyed so that they can never return to the market. Typical consignments are misprinted labels and bottles, recalled products after the contents have been removed, obsolete packaging after a brand redesign, and preforms or caps carrying a logo. All material is shredded, washed and turned into unbranded regrind at the Hat Yai plant on Kanchanavanich Road. These terms replace Version 2.4 of 15 January 2025 and apply to every consignment that arrives at the plant on or after 1 November 2026.

VeilGrind does not accept hazardous waste, containers that held pesticides, solvents or engine oil, PVC items, pharmaceutical blister packs that still contain tablets, or electronic devices. Such items found in a consignment are set aside and returned to the client at the client's cost.

2. Definitions

- **Client:** the company named on the signed VeilGrind service order.
- **Consignment:** all material delivered under one service order number, which always begins with the letters VG-.
- **Destruction run:** a scheduled session in which a consignment is fed into the dedicated VeilGrind shredder line in Hall 3.
- **Witness:** a person nominated by the client to watch a destruction run on site.
- **Certificate of Destruction:** the signed document confirming that a consignment has been destroyed, with its weights and the date of the run.

3. Accepted materials and preparation

Consignments are grouped into three categories, which decide the fee:

- **Category A, rigid single-polymer items:** PET, HDPE or PP bottles, jars, caps, preforms and closures.
- **Category B, flexible film:** printed LDPE or PP film, shrink sleeves, labels on reels and pouches made of one polymer.
- **Category C, multilayer items:** laminated pouches, sachets, metallised film and tubes made of several layers.

Material must be delivered on pallets no heavier than 1.2 tonnes each, stretch-wrapped, with the service order number written on every pallet. Mixed categories may arrive in one truck, but each pallet must hold only one category. Containers must be empty. If more than 2 % of the delivered weight is product

residue, such as liquid, cream or powder, the plant charges an emptying fee of 2.50 baht per kg on the whole consignment.

4. Booking a destruction run

Destruction runs take place on Tuesdays and Thursdays, starting at 09:00 or 13:30. The VeilGrind line does not run on other days, so that it never handles ordinary recycling feedstock. To book a run, the client should follow these steps:

1. Send the signed service order to the VeilGrind booking desk (telephone 074 291 637), stating the estimated weight per category and the preferred run.
2. Book at least 5 working days before the run. The booking desk confirms the run and the delivery window by e-mail within one working day.
3. Deliver the consignment between 08:00 and 15:00 on a working day, no earlier than 3 working days before the booked run.
4. Register witnesses as described in section 5.

For product recalls, the client may request a Priority run. A Priority run can be held 2 working days after booking, including on a Saturday morning, and carries a surcharge of 35 % on the destruction fee. Priority runs are limited to 2 per calendar month for the whole plant and are allocated in order of booking.

5. Witnessing

A client may send up to two witnesses to each destruction run. Witness names and national ID or passport numbers must reach the booking desk at least 2 working days before the run. On the day, witnesses report to the security gatehouse at Gate 1 at least 30 minutes before the run starts, complete a 20-minute safety induction and wear the ear protection and high-visibility vest provided. Closed-toe shoes are required; visitors in sandals are not admitted to Hall 3.

Witnesses watch from the viewing gallery above the shredder. They may photograph the shredder hopper and the regrind output bin, but photographs of other plant areas, machinery settings or other clients' material are not allowed.

> **Note.** If no witness can attend, the client may order a video record of the run instead. The plant films the feeding of every pallet from the gallery camera and keeps the video for 90 days. The video record costs 1,500 baht per destruction run and must be requested at the time of booking.

6. Fees

Destruction fees are charged on the weight recorded at the plant weighbridge when the truck enters, minus the pallets. The weighbridge weight is final. From 1 November 2026 the fees are:

- Category A: 3.40 baht per kg (until 31 October 2026 the rate was 3.10 baht per kg).
- Category B: 4.10 baht per kg.
- Category C: 6.80 baht per kg.

A minimum charge of 4,000 baht applies to every consignment, whatever its weight. For clean Category A material, the plant deducts a regrind credit of 0.90 baht per kg from the fee, because this regrind can

Fictional document created for testing a question-answering system. All names, figures and organisations are invented.

be sold to pipe and strapping makers. No regrind credit is given for Category B or C material. Invoices are issued after the Certificate of Destruction and are payable within 30 days. VAT is added to all fees.

7. Chain of custody and security

The client must send each consignment in a closed truck or container sealed with a numbered seal, and give the seal number to the booking desk before the truck leaves. On arrival the gatehouse guard checks the seal against the booking. The Site Security Supervisor, Prasert Chaowalit, is responsible for the gate check, the locked storage and the gallery camera.

If the seal is missing, broken or carries a different number, the consignment is not unloaded into the normal storage area. It goes to the locked quarantine cage in Bay 7, the client is informed by telephone within 2 hours, and the material is destroyed only after the client confirms in writing that it accepts the consignment. In that case the material is destroyed at the next free run, not at the run originally booked.

Accepted consignments are kept in the locked VeilGrind store in Hall 3 until their run. No consignment is stored for more than 10 calendar days. If the client postpones a run beyond that limit, a storage fee of 200 baht per pallet per day is charged from the eleventh day.

8. Certificate of Destruction

The Certificate of Destruction is issued within 3 working days after the destruction run. It is signed by the Destruction Service Manager, Natthaya Sirikhet, and states the service order number, the seal number, the weight received per category, the weight of regrind produced and the date and time of the run. The certificate is sent as a signed PDF, and a paper original is posted on request.

Errors in a certificate are corrected free of charge if the client reports them within 30 days of issue. A replacement copy requested for any other reason costs 300 baht.

9. Cancellation and liability

- Cancellation more than 3 working days before the run: free of charge.
- Cancellation 1 to 3 working days before the run: 25 % of the estimated destruction fee.
- Cancellation on the day of the run, or no delivery: 50 % of the estimated destruction fee.

The plant's liability for any consignment is limited to the destruction fee paid for it. The plant is not liable for delays caused by a broken seal, missing documents or excluded items found in the load.

10. Contact

Questions about these terms should be sent to Natthaya Sirikhet, Destruction Service Manager, Thung Lung Polymer Reclaim Co., Ltd., telephone 074 291 630, Monday to Friday from 08:30 to 16:30.
